Tempera v1.3.3 by [Cryout Creations](#)

COFFEE BREAK

While looking at Tempera you will notice what may appear as colors. You'll see them within images, in links and menus, defining borders and backgrounds, part of animations, hover effects and more.

But don't let that fool you, those are not colors. What you're actually seeing is a complex mix of coffee and our own blood - you'd be surprised to see how hues we can get by mixing those two. But as of late we've been feeling pretty dizzy and light headed and it's not from the lack of blood (we are secretly vampires).
